Work

Goalie App, Product Design

I designed a goal tracker app in **Figma** which i intend to develop . the design was based of **paper wireframes** i had made using a mix of a **human centered design** approach and an optimised version of the **Google design sprint** process to come up with a design that is easy to understand & functional.

Video Player App, Product Design

I designed, wireframed and did **hi-fidelity prototypes** for a fictional video player app using **Figma**. I used **Miro** to map out the **user journey map** and then using a mix of the **human centered design** approach and an optimised version of the **Google design sprint** process to come up with a design for a highly organised video player app.

Lurkdevs , Product Design & Frontend Development

I started a web design,development & consultancy company and have had the pleasure of working with a number of clients through the company.At the company I cover different roles including Product Design, Web development and Copywriting.
